To Those Concerned:

March 1999 I started using a “Jupiter” water purifier ionizer. A year later I still cannot believe how my life has improved from changing one small thing in my everyday life.

I suffer with the following problems – hypoglycemia, degenerative disc disease, and fibromyalgia.

Needless to say we have spent thousands of dollars to regain and restore my health. And most of everything we tried helped me in some way, but the ionized water has been worth every penny and I can confidently say has benefited me more than all the many holistic remedies I’ve tried.

I’m 43 years old and I’ve lived with pain for many years, and as time has gone by, I’ve given up on being active physically, or any high energy type activities. Within 2 days of drinking this water I noticed a higher energy level. After approx. 6 weeks my body went into a mild cleanse where I suffered mild headaches. My feet always hurt especially upon rising in the morning, this went away completely and only occasionally returns. My fibromyalgia attacks subsided to only seasonal flare-ups, and the pain in my arms and hands almost completely disappeared. Lower back pain is still a problem, but this too is less chronic. Chronic sore throat was also part of daily living, as my immune system was so severely stressed, I always felt like I was coming down with something, this too is gone.

It’s a true God-send in my life, as in this short year I’ve accomplished tasks that I could never think of taking on before, (like painting and decorating the entire inside of my house, sewing, and I’m taking on gardening again, ONE of my past pleasures). Mental focus is steadily improving, as I’m reading and enjoying socializing again. It’s unending, I consume far less herbs and vitamins, I’m a better mother and wife, grandmother and friend, and super-Christian, God is my witness, as I’m enjoying life and love others again.

My husband can back up all my claims as I wasn’t much fun to live with anymore, now he’s buying me flowers instead of pills all the time. Plus he’s feeling more energetic himself and would never think of the cost involved as we’ve all benefited from this incredible machine.

**Yours Sincerely,
Faye Suderman**
