

MY PERSONAL EXPERIENCE WITH KABEN PRODUCTS:

September, 2003

It is with much conviction that I take this opportunity to endorse the Regency II Water Ionizer and the GS-3000 Air Ionizer! Here is my story...

In June of 1987 I was the recipient of a liver transplant for Wilsons Disease, a hereditary condition causing a copper overload. My climb back to a reasonable level of life and energy was relatively trouble free, with the greatest challenge being the immune deficiency caused by the anti-rejection drugs. By the early 90's however, I began experiencing increasing heart problems. A lot of arrhythmia, frequent episodes of SVT's (racing heart), a silent heart attack, and most recently a VT, left me stripped of any vibrance and energy.

A kitchen stool followed me all around my kitchen as I struggled to perform the very basic duties of a homemaker. My husband looked after the more "challenging" tasks such as vacuuming, running the stairs to do the laundry etc., gardening and yard work. Any amount of activity and I would end up in a SVT episode and another stay in our local ICU.

In June of 2003, God in His wisdom, saw fit to change all that. On June 1, we were introduced to the GS-3000, which took care of a chronic cough I had been experiencing . Both my husband and I also enjoyed more restful nights. Then on June 16, we were offered to try the Regency II. By the third day both my husband and I noticed my energy level beginning to climb. I need to point out that I indulged in the high alkaline, oxygen rich water (obviously the machine couldn't help just standing on my counter!) In the ensuing days, this "90 year old" woman began acting her age of a spry 50.

The next change I noticed was that I was leaving my kitchen stool behind as I worked in my kitchen. I began making more trips into my basement, and yes, I weeded my garden without getting worn out after only one and a half rows. Our two daughters are delighted to actually be able to shop with their Mom rather than having me sit in the middle of the mall while they explore the shops by themselves! My energy lasts through most of the day now, instead of only the first hour or two.

Having been implanted with a defibrillator after my VT last summer, I have to go for an interrogation every six months. I mentioned I got the ionizers in June. On July 3/03 was my interrogation appointment. My nurse was complaining profusely about my hearts activity in April and May and so I interrupted her with "How about June?" With much surprise in her voice she said "That month looks a lot better!" Who can argue with that!

The other Sunday in church we sang three hymns with five stanzas each and I sang all the way through without missing a beat. As we climbed into bed that night, my husband shared that it was all he could do to hold back the tears as he heard me singing right to the end of each and every verse. Usually a stanza or two would be all I could sing.

It has been three wonderful months of enjoying life on a renewed level. I am so thankful to God for bringing Ben and Katy Toews of the KaBen Company and their Air and Water Innovations into my life!
